BEANT COLLEGE OF ENGINEERING AND TECHNOLOGY, GURDASPUR

December, 2009

ABSTRACT

Name: AMNINDER SINGH

Organization: NIIT Sec. 17-C, CHANDIGARH

Center: Computer & IT Training and Education Center

Trainee as: Desktop Application Developer in Java Technology

Department: Computer Education

This project "Java Media Player" is the project allocated by NIIT Education and Industrial Training Institute which aimed at providing education and training in various computer language and technical fields. Developing a Desktop Application which use JMF for processing real-time media. The user is provided a Graphical User Interface for better multimedia and user setting interaction. The user can save the playlist for future use and the format is also readable in all other players. This player acquires codec installed on the Client system for better sound quality, the top most using codec is DOLBY NR.

ACKNOWLEDGEMENT

Well, to say that only I had done all the efforts to make this project come alive would be Untrue. There are people, some of them are so wonderful that made this project come alive. I would like to thank them all, in particular:

Mr. Amarpal Singh HOD, CSE and **Mr. Rajeev Bedi, Asst. TPO (CSE) BCET GURDASPUR** for their tremendous support. Their encouragement and motivation provided me tremendous energy to do work. Without his encouragement and guidance this project work would not have been materialized.

I would like to show my greatest appreciation to my training tutor **Mr. Sachin** my training guide. His in-depth knowledge of JAVA really helped me understand the structure.

I would also like to show my respect to my dear friend, my mentor and my project coach **Mr. Gurinder Singh**. If he hadn't harassed and encouraged me all the way, I would have given this up a long time ago.

I'm highly grateful to my senior team members here at NIIT, for their thorough guidance right from day 1 till the end of training. They actually laid the ground for conceptual understanding of technologies and planning used in project.

Amninder Singh

CHAPTER NO.	TITLE	PAGE NO.
I	ABSTRACT	ii
II	LIST OF FIGURES	vi

1. Introduction
1.1 Introduction 1
1.2 NECESSITY 1
1.3 OBJECTIVES 1
1.3.1 Practicality 1
1.3.2 Efficiency 1
1.3.3 Cost 1
1.3.4 Flexibility 1
1.4 THEME 1
1.4.1 Tab Driven Approach 1
1.4.2 Easy retrieval of data 1
1.4.3 User friendly 1
1.5 ORGANIZATION 1
1.5.1 Achievements & Milestones 3

2. LITERATURE SURVEY RELATED WITH TRAINING 5
2.1 Preliminary investigation 5
2.2 System Analysis 5
2.3 Feasibility Study 5
2.3.1 Types 6
2.3.1.1 Technical feasibility 7
2.3.1.2 Operational Feasibility 7
2.3.1.3 Economical feasibility 7

3. TRAINING WORK 9
3.1 Idea Statement 9
3.2 Why Mp3? 9
3.2.1 MP3 Encoding 9
3.2.2 MP3 file structure 11
3.3 Project Plan 12
3.3.1 Team Structure 12
3.4 System Development Life Cycle 12
3.4.1 Systems Development Phases 12
3.4.1.1 Initiation / Planning 14
3.4.1.2 Investigation phase 14
3.4.1.2.1 Investigation 14
3.4.1.2.2 analysis of investigation 14
3.4.1.2.3 Constraints and limitations 15
3.4.1.3 System Design 15
3.4.1.3.1 Characteristics of Well Defined System 16

3.4.1.3.2 Two layers of projects 16
3.4.1.3.2.1 Stored Procedures 16
3.4.1.3.2.2 Designing Layer 23
3.5 Hardware & Software Requirements 24
3.5.1 JAVA system requirements 24
3.5.1.1 operating system requirements
3.5.1.2 Hardware requirements 24
3.6 Data Flow Diagram 24
3.6.1 DFD symbols 24
3.6.1.1 DFD symbols descriptions 25
3.7 Overview Of Java 28
3.7.1 introduction of java 28
3.7.2 java platform 28
3.7.3 performance 29
3.7.4 condition statements 29
3.7.5 the switch statement 31
3.7.6 the do-while statement 33
3.7.7 the for statement 34
3.7.8 defining methods in java 35
3.7.8.1 name the methods 36
3.7.9 the catch or specify the requirement 40
3.7.9.1 how to throw the exception 41
3.7.10 AWT Component 45
3.7.10.1 checkboxes and radio buttons 45
3.7.10.2 list and combo boxes 48
3.7.11 Borders 50
3.7.12 Menus 53
3.7.13 Event Handling in java 58
3.7.13.1 the MouseListener Interface 61
3.7.14 JAVA MEDIA FRAMEWORK 62
3.7.14.1 understanding JMF 62
3.7.14.2 high level architecture 62
3.7.14.3 time model 64
3.7.14.4 Manager 65
3.7.14.5 JMF event model 65
3.7.14.6 User interface component 66
3.7.14.7 Player 66
3.7.14.7.1 player states 67
3.7.14.7.2 presentation controls 69
4. Evaluation Of Training 70
4.1 Output of Player 70
4.1.1 Load Song 70
4.1.2 Song Properties 71
4.1.3 Status & Video Panel 72
4.1.4 Save Playlist 73
4.1.5 Color Theme Selection 74
4.1.6 The About Box 75
4.1.7 Full Screen Window 76
5. Conclusion & Future Scope of Training 77
5.1 Conclusion & Verifiable 77

5.2 Future Aspects 77
6. Appendix 78
7. References 79
